

FIDELITY INVESTMENTS® MUTUAL FUNDS PERFORMANCE REPORT

PERFORMANCE UPDATE

AS OF DECEMBER 31, 2007

UNDERSTANDING INVESTMENT PERFORMANCE

As you review this update, please remember that the performance data stated represents past performance, which does not guarantee future results. Investment return and principal value of an investment will fluctuate; therefore, you may have a gain or loss when you sell your shares. Current performance may be higher or lower than the performance stated. To learn more or to obtain the most recent month-end performance, call Fidelity at 1-800-343-0860 or visit <https://www.mysavingsatwork.com> (log in, choose plan, select "Investment Choices & Research," and then pick investment option).

SPECIALTY / SELECT FUNDS▶ (CONTINUED)

MARKET INDICATORS^^

For comparison purposes only. It is not possible to invest directly in these indicators.

Dow Jones Industrial Average	-3.91	8.88	8.88	12.24	7.43
Lehman Brothers Intermediate U.S. Government/ Credit Index	2.90	7.39	7.39	4.06	5.76
MSCI EAFE® Index	-1.74	11.33	11.33	21.83	8.90
Standard & Poor's 500 SM Index	-3.33	5.49	5.49	12.83	5.91

Total returns are historical and include change in share value and reinvestment of dividends and capital gains, if any. Cumulative total returns are reported as of the period indicated. Life of fund figures are reported as of the inception date to the period indicated. The figures do not include the effects of sales charges, if any, as these charges are waived for contributions made through your company's employee benefit plan. If sales charges were included, returns would have been lower.

With the exception of domestic equity mutual funds, investment options have been assigned to investment categories based on Fidelity's analysis. Fidelity has verified the accuracy of the placement of certain third party non-mutual funds with either the plan sponsor or the plan sponsor's consultant. Within Domestic Equities, mutual funds are listed according to their actual Morningstar categories as of the date indicated. Morningstar categories are based on a fund's style as measured by its underlying portfolio holdings over the past 3 years and may change at any time. These style calculations do not represent the funds' objectives and do not predict the funds' future styles.

SPECIFIC FUNDS

- ↕ Expense Ratio is the total annual fund operating expense ratio from the fund's most recent prospectus. For a mutual fund, the expense ratio is the total annual fund or class operating expenses (before waivers or reimbursements) paid by the fund and stated as a percent of the fund's total net assets. Where the investment option is not a mutual fund, the figure displayed in the expense ratio field is intended to reflect similar information. However, it may have been calculated using methodologies that differ from those used for mutual funds. Mutual fund data has been drawn from the most recent prospectus. For non-mutual fund investment options, the information has been provided by the trustee or plan sponsor. When no ratio is shown for these options it is due to the fact that none was available. Nevertheless, there may be fees and expenses associated with the investment option.
- Total returns shown prior to September 19, 2002, are Fidelity Advisor Floating Rate High Income Fund Institutional Class, which commenced operations on August 12, 2000.
- ♣ Formerly known as Fidelity Growth & Income II (12/01/07).
- *** Effective September 30, 1997, Fidelity *Magellan*® Fund was closed to most new accounts. Participants may continue to invest in these funds if they are already offered through their employer's plan. They are no longer available as new investment options.
- † Effective July 30, 2004, the Fidelity Low-Priced Stock Fund was closed to new accounts. Participants who have a balance in Low-Priced Stock in their retirement plan account on or after that date will be able to continue making and changing contributions, and they will also be able to make exchanges into the Fund. Participants who do not have a balance in Low-Priced Stock in their retirement plan account on or after July 30, 2004, will not be able to make contributions or exchanges into the fund.

MARKET INDICATORS

^^ Indices are unmanaged and you cannot invest directly in an index.

Dow Jones Industrial Average (DJIA), published by Dow Jones and Company, is an unmanaged average of 30 actively traded stocks (primarily industrial) and assumes reinvestment of dividends. It is not offered as a comparison for any investment option but rather as a general stock market indicator.

Lehman Brothers Intermediate U.S. Government/Credit Index is an unmanaged, market-value weighted index of government and investment-grade corporate fixed-rate debt issues with maturities between one and ten years.

Morgan Stanley Capital International Europe, Australasia, and Far East (MSCI EAFE®) Index is a market capitalization-weighted index of equity securities of companies domiciled in various countries. The Index is designed to represent the performance of developed stock markets outside the United States and Canada and excludes certain market segments unavailable to U.S. based investors. Index returns for periods after January 1, 1997 are adjusted for tax withholding rates applicable to U.S. based mutual funds organized as Massachusetts business trusts.

The Standard & Poor's 500SM Index (S&P 500®) is a registered service mark of the McGraw-Hill Companies, Inc., and has been licensed for use by Fidelity Distributors Corporation and its affiliates. It is an unmanaged index of the common stock prices of 500 widely held U.S. stocks.

AS OF DECEMBER 31, 2007

INVESTMENT RISK

- ➔ These funds are subject to the volatility of the financial markets in the U.S. and abroad and may be subject to the additional risks associated with investing in high yield, small cap and foreign securities.
- * *An investment in a money market fund is not insured or guaranteed by the FDIC or any other government agency. Although money market funds seek to preserve the value of your investment at \$1 per share, it is possible to lose money by investing in these funds.*
- In general, bond prices rise when interest rates fall, and vice versa. This effect is usually more pronounced for longer-term securities.
- ⚠ Lower-quality debt securities involve greater risk of default or price changes due to potential changes in the credit quality of the issuer.
- †† Foreign investments, especially those in emerging markets, involve greater risk and may offer greater potential returns than U.S. investments. This risk includes political and economic uncertainties of foreign countries, as well as the risk of currency fluctuation.
- ⊕ Investments in mid-sized companies may involve greater risks than those of larger, more well-known companies, but may be less volatile than investments in smaller companies.
- ◆ Investments in smaller companies may involve greater risks than those of larger, more well-known companies.
- Because of their narrow focus, sector funds may be more volatile than funds that diversify across many sectors.

Before investing in any mutual fund, please carefully consider the investment objectives, risks, charges and expenses. For this and other information, call Fidelity at 1-800-343-0860 or visit www.fidelity.com for a free mutual fund prospectus. Read it carefully before you invest.

NOTES:
